Contingency Plan

Write.as Compartmentalization: The tactic is to have multiple Write.as links for each level of privacy in order to contact one another in case the internet gets heavily censored and backup links and servers get taken down.

Step 1: Download Tor and use it for these various steps. https://www.torproject.org/download/
Step 2: Create a Write.as account. https://write.as/start/trial
Step 3: Save the User Name and Password to your Write.as Template in the Resources Folder.
Step 4: Create a message, Set Publish to… Anonymous, and click Publish.
Step 5: Save the newly created Write.as link to your Write.as Template.
Step 6: Repeat steps 1-7 two more times until you have 3 Write.as links.
Step 7: Give trusted people the Private Write.as link, Semi-Trusted people the Semi-Private Write.as link, and the people who aren't trusted the Public Write.as link.
Step 8: Save the names of the people you gave your Private and Semi-Private Write.as links to.
Step 9: Update the Write.as links if your backup servers get taken down.

Because Freenet doesn't allow you to update your website on the same link, +1 to the number at the end of the link to get the updated website Example: **Current link:** /TheTruthfolder/1/ **Updated link:** /TheTruthfolder/2/

Creating an Anonymous Discord Account:

First, change your DNS server using https://alternate-dns.com/ so your ISP doesn't track you through super cookies. Next, open Tor Browser, create an email on https://account.protonmail.com/signup?language=en and use https://generator.email/ as the recovery email , and register the account on https://discord.com/register. After that, verify the email on your email service. Then phone verify the account by purchasing a phone verification from https://smspool.net/. (Make sure you are clearing your browser's cookies, and changing your spoofed profile every time you make an account.)
